## ABOUT ME

Full stack developer with a curious mind and a penchant for solving complex puzzles. Personable, focused personality that thrives alongside equally ambitious colleagues. Comfortable working virtually on a team comprised of both onshore and offshore coworkers.

## WORK EXPERIENCE

### Software Developer

04/2022 - Present

Optum

- Spearheaded the design, development, and implementation of internal software applications, resulting in smooth and efficient business processes.
- Collaborated with cross-functional teams and stakeholders in a scaled Agile environment to create and maintain a document management application, enhancing overall product functionality and usability.
- Analyzed and improved document import processing by reviewing daily log files and investigating and fixing errors.
- Provided exceptional service to key business clients by proactively resolving bugs and continuously improving features, resulting in increased client satisfaction and retention.
