About Me

Full-stack developer with a curious mind and a penchant for solving complex puzzles. Personable, focused personality that thrives alongside equally ambitious colleagues. Comfortable working virtually on a team comprised of both onshore and offshore coworkers.

Skills

Javascript, HTML5, CSS3, Java, C#, Spring Boot, Hibernate, Express.js, Node.js, React.js, Bootstrap, jQuery, MongoDB, MySQL, Scrum/Agile, RESTful APIs, GitBash

Experience

Software Engineer, Optum (Contracted by TEKsystems)   **Aug 2022 – Dec 2023**
- Utilized C# and Javascript to assist in the design, development and implementation of enterprise software applications, resulting in smooth and efficient business processes
- Collaborated with cross-functional teams and stakeholders in a scaled Agile environment to create and maintain a document-management application, enhancing overall product functionality and usability
- Took over the responsibilities of a senior developer on a major project, leading requirements-gathering meetings and pushing code to production on a continual basis
- Provided exceptional service to key business clients by proactively resolving bugs and continuously improving features, resulting in increased client satisfaction and retention

Professional Projects

Commissions Processing, Optum   **Jan 2023 - Dec 2023**
- Process insurance policy statements and flow data into multiple databases in order to compensate insurance agents efficiently
- Use a combination of Javascript and C# to sort individual statements into categories and save files to specific locations
- Build a UI using OnBase, a modular low-code tool, that allows the user to move the statements through a workflow as they verify data and attach relevant documents

Deployment Tracker, Optum   **Feb 2023 - Dec 2023**
- Create a full-stack app which allows software development teams to keep track of all deployments to production
- Developers can attach testing documentation and save important details such as Demo Date, Backout Plan, and Support Timeframe
- Adds functionality beyond our existing project management tools by creating a more detailed paper trail for all deployments
- Includes email reminders to developers and feature owners to ensure product gets deployed on schedule

Education

University of Arizona – Full Stack Web Development Certificate   **Feb 2020**
Scottsdale Community College – Associate of Arts   **Jun 2017**
